Sardar Patel Degree College

Bechlore of Computer Application

07/2016 - 06/2019

PROFILE

Results-driven Senior Inside Sales Manager with 5 years of experience scaling B2B teams and executing complex consultative sales. I bridge the gap between sales strategy and technical execution, leveraging expertise in Cloud AI and full-stack development to align market demands with product capabilities through intelligent, data-driven automation. As a Team Lead, I manage a specialized group of associates, overseeing data acquisition and daily campaign reporting. By implementing AI-driven workflows and multi-agent systems, I modernize the sales cycle, drafting technical protocols that ensure operational excellence and high-integrity lead management for sustainable business growth

EXPERIENCE

CompQsoft Digital 10/2024 - Present

Senior Inside Sales Manager

- Team Leadership & Management: Directly managing a team of 4 associates, providing technical mentorship, and overseeing daily sales operations to ensure consistent output and professional growth.
- End-to-End Data Acquisition: Extracting high-quality B2B lead data from diverse primary and secondary sources, ensuring data integrity and precision for targeted outreach.
- Multi-Channel Campaign Execution: Launching and managing multiple concurrent campaigns across cold calling, email, and LinkedIn InMails to maximize lead generation and market penetration.
- Strategic Reporting & Presentation: Preparing comprehensive performance reports and presenting actionable insights to senior management to guide high-level business decisions.

Funnl 04/2021 - 10/2024

Team Lead

- Data Extraction & Strategic Research Executing advanced primary and secondary research to extract high-quality datasets, ensuring all data acquisition aligns with the overarching campaign strategy and client-specific requirements.
- ampaign Orchestration & Lead Generation Planning and launching multi-channel outreach strategies, while actively monitoring real-time performance to consistently generate 3-4 high-quality leads per day.
- Team Leadership & Operational Management Managing a team of 6-7 members, providing technical guidance on data workflows, and conducting internal meetings to ensure team alignment with project goals.

PROJECTS

ML Suit 03/2026 - 04/2026

- This ML SaaS platform automates the machine learning lifecycle, from data ingestion and pre-processing with visual charting to individual model training. It utilizes hyperparameter tuning to identify the optimal algorithm for any dataset and maintains granular developer logs to track progress and ensure transparency across the engineering team
